ENTERED AT SAN FRANCISCO, CAL. AS SECOND-CLASS MATTER

The New "Dorland" is Ready

ENTIRELY RESET WITH 7,000 NEW WORDS.

The revision for this new (6th) edition every sense—reset from A to Z. To "new edition." It means a new work in every case—reset from A to Z. To keep the volume within bounds, provision was made for the vast number of new words added—*well over 7000*—by selecting a type which, while even more legible than the old, permitted of getting twelve lines more on the page. This new revision attains a superiority impossible in any first edition, because it is at once a product of to-day and the result of eleven years' growth and development. Its information is of the current year; its character, the inheritance of six successful editions.

ITS TEN POINTS OF SUPERIORITY

Those distinguished by an asterisk (*) are new with this edition

- | | |
|---------------------------------|----------------------------------|
| 1. New Words | 6. Ease of Consultation |
| *2. Capitalization | *7. Medical Biographies |
| 3. Pronunciation | 8. Anatomic and Other Tables |
| 4. Etymology | *9. Dosage and Therapeutic Table |
| *5. Veterinary and Dental Terms | 10. Every Word Defined |

Octavo of 986 pages, with 323 illustrations, 119 in colors. New (6th) edition. Edited by W. A. Newman Dorland, M. D. Flexible leather, \$4.50 net; thumb indexed, \$5.00 net.

Laibose

IS A FOOD

COMPOSED OF THE SOLIDS OF
PURE WHOLE MILK AND THE
ENTIRE DIGESTIBLE SUB-
STANCE OF WHOLE WHEAT—
A CONCENTRATED FOOD OF
HIGH CONTENT OF ACTUAL
DRY NUTRITIVE MATERIAL.

LAIBOSE is a new and original addition to the resources of feeding, designed to meet important and well-recognized requirements, a food of proved value before its general introduction to physicians.

The statement of the analytical composition of Laibose on label and circular enables the physician to direct its use upon the basis of calculable calory and co-efficient of energy of a known definite source and availability.

LAIBOSE is prepared for use by the simple addition of water, usually 3 to 4 parts; is very agreeable when taken dry.

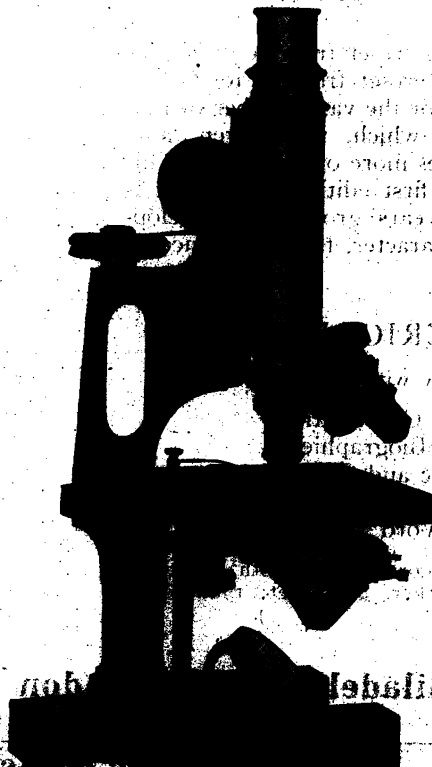

Descriptive circular with analysis, "Formulas"
and "Directions" upon request

DOCTOR---Investigate the Alkaloidal Way

Every doctor worthy of the name will be using the active principles.

Already, over fifty thousand are using them in the form of our granules. They are reliable—made from selected materials, in specially equipped laboratories by skilled hands, after years of study.

Price \$1.00; sent prepaid, cash with order. Your choice of these fillings:

Aconitine, gr. 1-134; Veratrine, gr. 1-134; Digitalin, gr. 1-67; Quassin, gr. 1-67; Strychnine, gr. 1-134; Calcium Sulphide, gr. 1-6; Glonoin, gr. 1-250; Morphine Sulph., gr. 1-12; Podophyllin, gr. 1-6; Colchicine, gr. 1-134; Calomel, gr. 1-6; Codeine, gr. 1-67; Aloin, gr. 1-12; Quinine, gr. 1-6; Camphor Monobrom., gr. 1-6; Ergotin, gr. 1-6; Atropine Sulph., gr. 1-250.

Give yourself and your patients right now the benefits that these fine-edge tools afford. Get results where before you have gotten only failures, just because you persisted in sticking to the old tools—the tincture and other uncertain fluids.

Investigate today! Send a dollar bill for the 300-page book and granule case shown here. It will prove the best investment you ever made.

Here Is the Best Saline

For General Use

Wherever it is desirable, as a preliminary step, to empty the bowel thoroughly, give Abbott's Saline Laxative. One full dose will do it in from two to six hours, leaving the bowel clean and clear of bacteria-feeding, toxin-breeding residue. A small, early-morning dose will accomplish wonders for the patient who is inclined (as are elderly people, especially) to be costive, and torpid of liver. The teaspoonful dose needs no increase even when taken for many years.

Supplied in three sizes at 20c., 35c. and 75c. for single bottles; and \$2.00, \$4.00 and \$8.00 per dozen. If not obtainable at your druggist's we will ship direct, prepaying delivery for cash with order.

For rheumatism, Abbott's Saline can be added to any favored treatment. Same size bottles and prices as Abbott's Saline Laxative.

SOLIDARITY: "A communion of interests and responsibilities."
Century Dictionary.

WESTERN SOLIDARITY

is becoming the greatest factor in the upbuilding of the West.

Just so long as we of the West were content to be "Hewers of wood and carriers of water" for the East, furnishing raw materials and taking manufactured articles at eastern terms, just so long the West remained a country of magnificent distances and sparse population.

All this is changing, it is now realized that, everything else being equal, preference should be given to the products of western enterprise, to the end that a self-sustaining empire should be built up west of the Rockies.

The writer's grandfather used to say (this was in New England) "I would rather give a shilling (25 cents) for a knife made in my own country than a 'York shilling' (12 1-2 cents) for a knife made in a foreign country."

But such self-sacrifice is not necessary in the West today, at least as far as the products of the Cutter Laboratory are concerned, for not only is this laboratory producing biologics at least equal to those of the East and foreign countries, but it was the pioneer in materially reducing the price of high grade Diphtheria Antitoxin, making it possible to use large doses at a fair cost.

Naturally, our Eastern friends resent this breaking in on (what they considered) their preserves and profits, and, as you know, they are working aggressively trying to recover the ground they have lost in the West.

Their ulterior purpose is either to put us out of business or to force us to raise our prices on Antitoxin. They cannot do the first, nor can they do the second so long as we are convinced that physicians approve our course and will fight with us for independence from eastern domination.

On this point we feel secure, for motives of humanity, business and loyalty to the West all urge that you more insistently than ever give preference to Cutter biologics—Diphtheria Antitoxin especially.

Not only specify but see that you get "CUTTER'S"

THE CUTTER LABORATORY

Operating Under U. S. Government License No. 8

Berkeley, California.

A. M. A. Principles of Ethics.

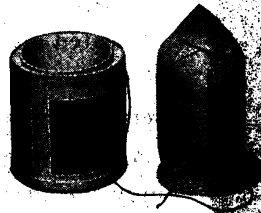

"It is equally derogatory to professional character for physicians to dispense or promote the use of secret remedies."

Made With Utter Care

The B & B reputation has been twenty years in the building. It is the result of infinite care, of ceaseless experiment, of constantly seeking perfection.

Each formula and process is the final result of years spent in study, invention and sifting.

A thousand surgeons have helped us with ideas. And thousands of others have benefitted by our results. The brand B & B is never put on anything which is not right through and through.

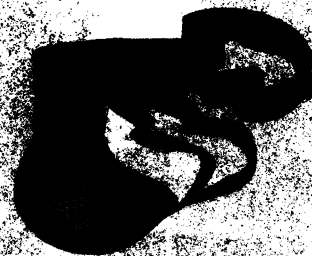

B&B Plaster Paris Bandages

Noted for uniformity, strength and dependability—for remaining unchanged, always fit to use.

To secure these qualities we spent two years in testing every possible formula. Then we devised machines to avoid the variations of compounding by hand.

The result is a bandage which is always alike—always the best Plaster Paris Bandage.

O-P-C suspensories

For twenty years more physicians have prescribed the O-P-C than any other suspensory.

The O-P-C is anatomically correct. It conforms to any size or condition. It affords an even and normal support. It leads to no constriction.

When the suspensory is once fitted, it needs no further adjustment.

The sack is seamless and self-adjusting. Made in lisle or silk.

DIAMOND ANTISEPTICS, LILLY

YOU CAN'T MISTAKE THEM IN THE DARK

¶ The tablets are diamond shape and marked "POISON;" the bottle is of peculiar design—safeguarding users against error.

¶ Mercury Bichloride is first among the powerful germicides. The safest and best way to use it is in the form of Diamond Antiseptics, Lilly, which combine rapid solubility and certainty of germicidal action with the greatest safety possible.

Back View of Bottle
Containing 25 Large Tablets

¶ The tablets are hand-molded and their loose texture, angular shape and large surface render them rapidly soluble.

¶ A small amount of citric acid is combined with the bichloride which prevents precipitation of insoluble mercury in neutral solutions, hard water or when in contact with albuminous liquids.

¶ Solutions of Diamond Antiseptics are permanent and act with certainty on all septic matter, even in blood, pus, serum, etc.

¶ While soft or distilled warm water is best for solutions, Diamond Antiseptics dissolve quickly in moderately hard water—an important advantage in emergencies.

¶ They are made in two sizes—LARGE and SMALL, containing 7.3 grs. and 1.82 grs. of Mercury Bichloride respectively, and three colors—White, Blue and Pink. The large tablets are supplied in bottles of 25, 100 and 1000, also in pounds. The small tablets are supplied in bottles of 100, 500 and 1000.

¶ By specifying Diamond Antiseptics, "Lilly," you will take every precaution possible against inefficiency and error. Send request for samples to Indianapolis.

IRON AND ARSENIC by injection of IRON CACODYLATE

The results to be obtained by the administration of Iron depend upon the form in which the Iron is chemically combined and upon the method of introducing it into the body. When taken by mouth, nearly all inorganic Iron compounds either seriously disturb digestion or are not absorbed, while if they are injected, they are very painful. Organic Chemical Compounds of Iron are practically free from these objections. Iron is not absorbed in the stomach and the intestinal area in which it is absorbed is very limited, whereas Iron injected intravenously or intramuscularly cannot escape absorption and cannot be eliminated till it has passed into the general circulation. When injected, you know that a definite amount of Iron has actually been absorbed, because the patient comes to you for each injection, and is under your constant supervision. This pays you and benefits the patient. Iron Cacodylate is injected for anemia, which in turn means lack of red blood corpuscles, which in turn means lack of hemoglobin, which in turn contains the Iron chemically combined. The anemia may accompany or be the result of tuberculosis, syphilis, skin disease, neurasthenia, general debility or other diseases. The Iron Cacodylate supplies the Iron necessary for producing the hemoglobin in the red blood corpuscles and in addition contains Arsenic, organically combined in the Cacodylate, giving the physiological effects of Arsenic without its toxic effects. The dosage commonly employed is one ampoule once, twice or thrice per week as the case requires.

Each tube contains the safe average dose of the active drug.

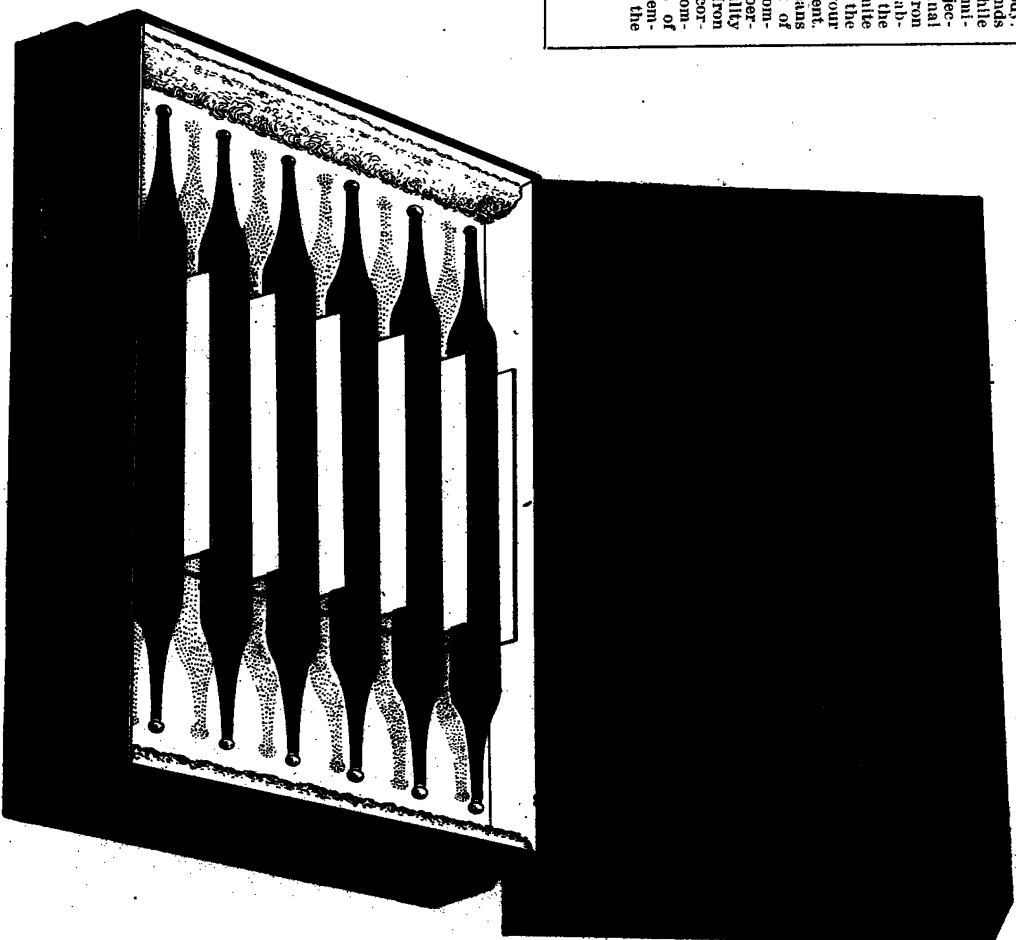

Your patient calls for each injection—
that helps you, don't it?

A definite dose is immediately
absorbed—
that helps your patient.

It cannot, and does not disturb
digestion—
that pleases you and patient.

You know he doesn't "forget"
his medicine—
that brings results for both.

Each preparation is packed:
12 Sterilized Tubes in the Box, 2 layers deep, 6 Tubes in each layer
The 16 preparations sell to the Physician for his personal use, at the uniform price of
\$1.50 per Box, through your Druggist or from us, postpaid, cash with order
The Druggist generally charges patient a higher price where sold as a prescription

The pleasantest and most efficacious mode of administering LITHIUM is in the form of a Potable Water.

Dr. Enno Sander's GARROD SPA LITHIA WATER

contains more Lithium than any other water on the market and in the most desirable combination. It is manufactured from pure chemicals and pure distilled water, heavily charged with pure carbonic acid gas. Its formula (originally suggested to Dr. Enno Sander by Sir A. B. Garrod, M. D.) is as follows:

LITHIUM BICARBONATE.....	GRS. XIV
MAGNESIUM BICARBONATE.....	GRS. X
POTASSIUM BICARBONATE.....	GRS. XVI
SODIUM CHLORIDE.....	GRS. X
CARBONATED WATER.....	OZ. XVJ

No natural water can possibly dissolve as much Lithium as this, nor in such an effective medicinal state.

It Is Sold as Follows:

"Still" Garrod Spa, in Half-Gallon Bottles. Price 50 cents each or \$6.00 a case of one dozen bottles.

"Sparkling" Garrod Spa, in Pint Bottles. Price \$2.00 a dozen or \$7.00 a case of 50 bottles.

The "Sparkling" Garrod Spa is well charged with gas, and is a pleasant beverage, used by many as a table water. This is the kind most used.

TRYPSOGEN

Is the most rational and most successful treatment for

DIABETES MELLITUS

as it supplies to the organism the enzymes and hormones, the absence of which is the cause of diabetes.

Each Trypsogen Tablet contains the internal secretions of the islands of Langerhans, also trypsin and amylpsin, bromid of gold 1/100 grain, bromid of arsenic 1/200 grain.

Trypsogen exerts a profound influence over nutrition, which is shown by a marked increase in weight and strength, hence is a very valuable adjunct in the successful treatment of all diseases accompanied by decline in weight and strength and loss of resisting power; but its special field of usefulness has been in the treatment of Diabetes Mellitus.

A series of valuable monographs covering recent work in digestion and nutrition, especially in their relation to diabetes, will be sent to any physician on request.

No. 1.—Diabetes Mellitus, Trypsogen Treatment.

No. 2.—Diet in Diabetes Mellitus.

No. 3.—Complication and Sequelae of Diabetes Mellitus.

No. 4.—Salivary and Pancreatic Ferments not Destroyed in the Stomach.

G. W. CARNRICK CO.

33 Sullivan Street

NEW YORK CITY

Proved Antitoxin

And the proof begins with the first step in the process of manufacture—the selection of healthy, vigorous horses: animals that have been pronounced sound by expert veterinarians. It ends only when the finished product is wrapped and labeled for the market. Our

Antidiphtheric Serum

AND

Antidiphtheric Globulins

are tested and retested—bacteriologically for purity, physiologically for activity. They are aseptic. They are of accurately demonstrated antitoxic strength. The syringe container in which we market them is a model of convenience and security.

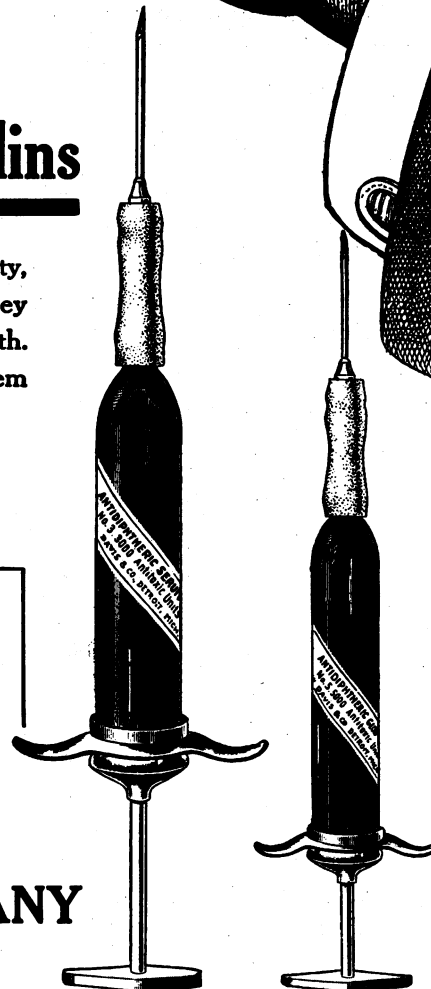

500, 1000, 2000, 3000, 4000 and 5000 units.
Prices, per given number of units, are the same for both
Serum and Globulins.

NOTE.—Our facilities for producing serums and related products are the most elaborate in the world. We maintain a large stock-farm, equipped with model stables and supervised by expert veterinarians, where are kept the animals employed in serum-production. Our biological laboratories are the admiration of scientific men who visit them.

The Angelus Hospital

Corner Washington and Trinity Streets Los Angeles, Cal.

HARRIET W. PAHL, Superintendent

A general hospital open to all reputable physicians. Quiet, elegant, spacious grounds; all outside rooms; fire-proof. It has an excellent Training School for Nurses, giving a three years' course of instruction.

The Florence N. Ward Sanatorium

A private hospital for medical and surgical Gynaecology and Obstetrics. It is a modern, fire-proof building, situated on a sunny slope; conveniently located near car lines and readily accessible to the business centers.

It possesses all the essentials of a perfectly appointed sanatorium, having a complete operating suite, insuring absolute asepsis.

Excellent service—only graduate nurses—together with the restfulness of the home atmosphere.

All grades of prices, from wards to private rooms with baths.

Open to all physicians.

Deimel Underwear

Wearing woolen underwear is akin to living in a room without ventilation. The air surrounding the body becomes sultry, moist and poisonous.

Please write for a sample piece of the Deimel fabric which is sent free. On receiving, hold it close to your face and you will observe such a sense of luxurious comfort, that you will decide to take off your irritating flannels and wear Deimel instead.

Rx. MUDLAVIA**MUDLAVIA, KRAMER, INDIANA****For Your
Rheumatic Case**

Doctor:

You will safe-guard your rheumatic subjects by advising a Fall Course of the Mudlavia treatment in advance of ugly weather, distinctly more efficacious and more pleasing to your patient than radical changes of climate. Three weeks spent here insures six months or more comfort at home in this climate. This experience has been verified by tourists and health seekers at this resort so often that hundreds make their annual visit here purely as a safe-guard against rheumatic tendencies. It is directly in line with the teachings of modern medicine. You can recommend both the resort and treatment to your most exacting patients with the assurance that their welfare will be zealously guarded and our relations ethical.

the Automatic Telephone?

Mr. Business Man:

Give any one of your clerks something to do, let him give it to a second, and he to a third, and the chances of making mistakes are just four to one what they might have been had you done the work yourself.

That applies to telephoning. A far distant number in the manual system requires from one to three or four repetitions by one "Central" to another. The HOMEPHONE way is the direct way. You call your own number without relays.

F. W. Birtch, M. D., Resident Physician.

LOCATION.—During the construction of the new \$400,000.00 150-bed Class A hospital building, now in progress, the old hospital buildings have been moved to the Army-street frontage of the property, have been thoroughly overhauled and in every way put in first-class shape so that the public is offered excellent accommodations with the best of care at moderate rates. Being situated in the "warm belt" of the Mission District, with all rooms getting a maximum amount of sunlight and having unlimited porch room, the hospital offers to convalescent patients the most favorable place in San Francisco for recovery.

RATES.—Ward beds \$14.00 per week. Private rooms \$17.50 to \$40.00 per week.

EQUIPMENT.—The hospital is complete in all departments having well equipped operating rooms; X-ray rooms; eye, ear, nose and throat rooms; laboratory, etc. A trained dietitian supervises all diets.

PRIVATE CASES.—Physicians bringing cases to the hospital may feel assured of receiving every professional courtesy and also prompt and efficient service from the house staff and nurses.

For further information apply to the hospital.
